Note: The reader will note that this document is based on the experience, since 1998, of the American licensor. The AVI inventory process is presently being introduced into Canada.

AVI
Asset Verification Inc.
"The Inventory Specialist"®

Insurance companies, estate planners and wealth management advisors all encourage clients to create and maintain a current, comprehensive list of assets for their protection. Based on actual work performed by AVI, 70% of our clients find their policy limits on personal property coverage, as established by their insurance companies, to be under valued by at least 40%.

AVI's services not only provide you with the list of assets you need, but ensure that your insurance coverage and estate and/or wealth management planning are based on fact, not fiction.

Inventory

AVI's detailed inventory of your personal property assets meets the needs of insurance adjusters, estate planners and wealth management advisors as we document the entire contents of your property, from fine crystal to computer equipment. Each inventory, formatted onto a CD-ROM, includes a detailed text printout describing all items, a built-in spreadsheet program, and detailed digital images of all items.

Aggregate Valuation

Our expert appraisers use your AVI inventory to compile a total valuation of your home's contents using insurance replacement costs. This provides ultimate convenience and accuracy because it saves you from the tedious task of assigning values to everything you own while allowing your insurance broker to see, at a glance, how much coverage is required to accurately compensate you in the event of a loss.

Appraisal Services

Knowing the total value of your personal property is essential to acquiring and maintaining proper insurance coverage. AVI's appraisers, associates of the American Society of Appraisers, can provide certified appraisals of antiques, artwork and other collectibles to assist you in your estate planning needs. AVI's trained and bonded inventory specialists collect all information about the item(s) to be appraised at your home so your treasured possessions never leave you.

Archiving Services

AVI's inventory specialists can archive important documents and irreplaceable photographs by making digital copies onto a CD-ROM. In the event of a loss, the replacement of these valuable documents or heirloom images is assured.

Annual Updates

To ensure the accuracy of the inventory process, AVI offers an optional comprehensive program, including annual updates, to keep your estate and/or wealth management planning activities current.

Password-Protected Database

All inventories are backed up in AVI's password-protected database. Clients who choose to have AVI update their inventory on an annual basis benefit from knowing that, if their inventory is lost or destroyed, a current copy is always available.
